

ID-Nr. 39036

SpillGuard® leak recognition system

The first warning system of its kind - fully autonomous, operated at the push of a button and suitable for fitting to any spill pallet, at any time. SpillGuard® reliably detects hazardous leaks and warns you immediately by means of an alarm. This saves valuable time for rectifying the situation and prevents even greater hazards.

- Simple installation: put into position, switch on, stay safe!
- A red LED indicates that the unit is operating safely over its entire service life.
- An audible signal lets you know in good time when SpillGuard® has reached the end of its life (up to 5 years) so you can replace it.
- Developed for years of reliable use – certified for ATEX-Zone 0
- Issues an audible and visible alarm for a minimum of 24 hours when contact is made with liquid hazardous substances.
- Can be used anywhere and is suitable for all common liquid hazardous substances, see resistance list.
- Simple and safe use thanks to intelligent sensor technology in a highly resistant, electrically conductive housing.

Technical data

Depth exterior	110 mm
Height exterior	40 mm
Weight	0,145 kg
EX protection class	Ex II 1 G EX ia IIB T4 Ga
Temperature range	0 °C to +40 °C

Area of application

Flammable substances
Substances hazardous to the environment/water
Acids and Alkalis
